LABOR RECORD

This page is for your use in keeping a record of your labor. Calculate the average amount of time spent on your project each day and multiply the number of days in the particular month for which the labor record is being prepared. Add to this figure extra hours worked and enter the total in the column entitled "Total Hours." At the conclusion of your project, total the number of hours worked. Include hours you ride for pleasure, exercising, and training. Enter the total hours labor for the project year in the space entitled "Total Hours Labor." Multiply hours, days, or months of labor by rate for a comparable period to give you "Your Labor Cost." Wage rates should be equal to the usual wage for the kind of work done, whether by hour, day, or month.
